

Hossein Rostami

Frontend Developer

Profile

A few years ago, I was introduced to the world of programming through a Python and Data Science course. That's when I realized coding isn't just about syntax – it's about creativity and building something meaningful.

Later, I decided to take this path more seriously and stepped into web development. I started with HTML and CSS, then moved on to JavaScript, Tailwind CSS, Git, and Regex.

My passion for crafting user interfaces led me to React, where I built several real-world projects.

Along the way, I also learned some TypeScript, and I'm currently learning Next.js to develop more complete and professional applications.

As a front-end developer, I love creating clean, smooth, and visually appealing user experiences – and I'm always eager to learn and grow.

If you're looking to collaborate on front-end projects, I'd love to connect 🍷

Education

- **Bachelor's degree in Computer Engineering**
Azad
2023 - 2027

Projects

- **Genius Academy**
Dec 2024 - Nov 2024
The educational site of Genius Academy is about programming education. This site has an attractive user interface and has two themes, light and dark, and is also fully responsive. This project was developed using Tailwind Css, React Js.

- **Frest Dashboard**

Apr 2025 - Feb 2025

Every business needs a professional admin panel to manage its activities. The First Panel, in addition to having a beautiful user interface, also consists of various charts, tables, calendars, etc. that the user can use according to their needs. This panel has been developed using React Js, Tailwind Css and is fully responsive.
